GENERATIVE AI FOR HR

Embracing the potential, understand the limits

Generative AI is reshaping the workplace. For HR, it's both a challenge and an opportunity: redefining roles, guiding transitions, and automating routine tasks to focus on strategy. Gain future-ready insights on how AI is reshaping work and how HR can prepare. Discover practical ways to apply Generative AI for job descriptions, competency assessments, and HR data analysis. Understand ethical considerations, including AI's limitations, data privacy, and the need for human oversight. Learn to streamline processes, foster innovation, and drive workforce transformation responsibly.

Key Takeaways:

- Introduction to AI
- Impact of AI on the future workforce
- Planning for and building a future AI ready workforce
- Practical GenAI Applications for HR
- Navigating the limits and Ethical implications of AI in HR

Technical Requirements:
Attendees are required to bring a laptop which can access to one of the following LLMs, such as Claude, Gemini, ChatGPT, to participate in the hands-on exercises. Some of the AI applications may require the paid version of the LLMs, it would be helpful but not required for the paid versions of the LLM. The trainer will demonstrate the features.
