About the workshop

Step into the light with our 1-day workshop. Designed for both novices and seasoned professionals, this one-day workshop is a deep dive into the world of data visualization, a critical skill in the data analytics toolkit. With PowerBI, a leading tool recognized for its robust capabilities and seamless integration with the Microsoft ecosystem, you'll learn how to bring your data to life.

Logistics Requirement:
Delegates are required to bring their laptops with MS Excel and PowerBI preinstalled.

Learning Outcomes

- Appreciate the impact that date visualization has on the realization of value in analytics; particularly in today's data driven world
- Understand the key principles and elements of building an impactful data visual
- Understand the basics of PowerBI navigation
- Gain practical experience in creating key features of PowerBI functionality such as charts, timelines and maps
- Develop an interactive dashboard and learn to gain insighs from it

Who should attend

- Analysts or Professionals with Analytics responsibilities, who are looking to be more effective in presenting complex data to audiences
- Managers responsible for managing and supervising a team of analysts
- All other professionals with a keen interest in developing strong foundations in data analytics
- Some prior knowledge in MS Excel and analytics could be helpful, but not required

Trainer Details

Michael Lee, MBA, BSc

Michael has over 25 years of IT experience across sales, client management, and operations, with roles spanning vendors, system integrators, distributors, and end-users in both public and private sectors. He previously led Asia Pacific sales operations at Linksys and held key leadership roles at Cisco, including sales and customer service operations, as well as heading a global Metrics & Business Intelligence team. He holds a Bachelor's in Computer Science & Mathematics and an MBA from NUS, and is an ACLP-certified trainer.
