

A practical programme that involves a 3-day workshop and two half-day consultancy sessions. Participants and their organisation will benefit from a practical (specific to their respective business) innovative and personally developed initiative/business/project which will have measurable positive outcomes.

Business Design Thinking Masterclass for a LEAN & Innovative Enterprise

Implement initiatives that have helped many progressive companies such as Wang by NTUC FoodFare, Khoo Teck Puat Hospital, Frank by OCBC, and many other large and small businesses thrive in this disruptive age. This course is IDEAL for progressive:

φ Business Leaders φ Board Members φ Business Owners φ Entrepreneurs φ C-suites
φ Executives φ Directors φ Managing Partners φ Management φ Start-Ups φ SMEs

Special Course Fee Funding for all Singaporean & SPR leaders!

SMEs get EXTRA funding! SMEs SAVE \$2,565! 90% funding benefit!

Due to heavy funding only 2 participants per company will be funded.

1. Attend this Masterclass to formulate new or improved business opportunities.
2. Designed to help businesses initiate, explore opportunities and ideas to improve or benefit the business, and open possibilities for Government grants and schemes.
3. It HAS ALREADY helped organizations and their management team to uncover NEW opportunities, reduce wastages or simply to do better at whatever they already do.

Workshop outline:

- Design Thinking for business and its relevance to growing business in Singapore.
- Showcasing the Design Thinking Empathy Toolkit through business and education cases.
- Empathy activities; Field exercise to apply the Empathy Toolkit, Photo interview to elicit customer stories, and Converting stories to "deep" customer insights to identify unmet needs.
- Identifying an innovation opportunity at work
- Need finding activity based on data collected from each respective company.
- Identifying & Crafting the Project, type of Photo Journaling tools, and gathering insights.
- Showcasing the Design Thinking Creative Toolkit through business and education cases.
- Ideation activity: Seeing possibilities and creating WILD ideas from your passion and life experiences.
- Conceptualisation: clustering and connecting ideas
- Introducing the Curious People Capability Prototyping Toolkit.
- Measuring quick wins: establishing productivity measurements and setting SMART goals

Join us, and be an Innovative Leader!

Includes 2 consultancy sessions with the trainer/consultant for your personal innovation business/project plan as part of programme.

The workshop is developed based on the Business Design Thinking methodology created and popularized by Roger Martin; it is the only form of Design Thinking in the world that is specially adapted for business to help organisations create solutions for challenges and growth. The trainers are professionally certified as specialists by the Rotman School of Management at the University of Toronto. Further to being certified, the trainers have adapted and localized the Design Thinking methodology to benefit numerous businesses in Singapore. They have worked with many local and foreign business, enabling them to develop and find new opportunities, including the ability to achieve LEAN and productive agendas when businesses embark on their journey in Business Design Thinking on a commercial level. Applicable for all Industries and business models (B2B, B2C, C2B, C2C, B2B2C), MNCs, SMEs, NGOs, etc.
