

Design Thinking for Problem Solving and Strategic Innovation (Online)

Your ability to adapt design thinking will allow you to solve problems objectively and come up with strategic innovation that serves a pragmatic purpose. With design thinking you can bring about creative solutions to solve complex business problems.

In this workshop you will be introduced to design thinking and how you can adapt this to transform your way of solving problems and coming up with innovative strategies that are both workable and productive in nature.

Course Objectives:

- How to apply design thinking for short-term and long-range planning
- Why every staff in the organization needs to be a good design thinker
- The 10 principles of design thinking and how to adapt this to your organization
- Using design thinking to address the nature of the problem
- Classifying problems as either being fuzzy or clear-cut and using design thinking to consider options
- Using design thinking to come up with practical innovation
- Learning to look at the big picture with design thinking
- How to create a design thinking culture within your organization
