

GMS WSQ: Implement Lean Six-Sigma (MF-PIM-401E-1)

*Participants will be awarded the **Statement of Attainment** upon successful completion of the course.*

Course Objective

On completion of this unit, learners will have the skills and knowledge in applying strategies, methods and tools used for developing and implementing lean six sigma project plans.

Target Audience

Those responsible for the operation and performance of an organisational unit.

Course Outline

This training unit provides participants to approach, understand and apply the lean transformation process systematically. It is designed to equip participants with the broad knowledge and tools to map the transformation for a system wide approach for developing and implementing lean six sigma project plans. It covers the following competencies:

- Map and evaluate business process using Value Stream Mapping tool
- Defines and establishes the value flow as pulled by the customer
- Identify and analyse non-value added steps or activities in a process using Value Stream Mapping tool
- Design and implement improvements to the business process
- Measure and evaluate the improvement measures implemented against determined specifications
- Implement a system of continuous-improvement in the process

Methodology

This workshop will comprise activities, case studies, group discussions, short lectures, self-reflections, etc.
